

## Web SW developer

Restorative Neurotechnologies Srl, also known as RNT, is a dynamic start-up company growing throughout Italy and Europe. RNT manufactures and commercializes a Class II Medical Device under MDR regulation for cognitive rehabilitation.

### Key responsibilities

- Design, develop, and maintain web applications with a focus on performance and user experience.
- Collaborate with cross-functional teams to define and implement new features.
- Perform thorough testing, debugging, and optimization to ensure software stability and performance.
- Stay up-to-date with the latest trends in mobile development and integrate new tools or processes as needed.
- Document code and development processes to ensure scalability and maintainability.

### Minimum entrance requirements

- Excellent knowledge of object-oriented programming.
- Strong skills in debugging, modifying, and updating existing applications.
- Solid proficiency in HTML, JavaScript, CSS, PHP, and jQuery.
- Familiarity with WordPress as both a CMS and a framework.
- Advanced knowledge of Laravel.
- Basic understanding of SQL and Linux.
- Bachelor's or associate degree in Computer Science.
- Good command of English.

## Working conditions

- 6-Month Consulting Contract with Potential for Extension
- RNT has offices in Palermo and in Torino. It is possible to come work in the office, applicants wishing to work remotely are also welcome to apply.
